## Overview

NetApp's Virtual Desktop Service allows organizations to manage deployments on prior releases, to preview future releases and to manage environments running one version prior (N -1 methodology).

### Virtual Desktop Service URLs

Virtual Desktop Service is the management console that administrators can use to manage VDS deployments on an ongoing basis.

### Virtual Desktop Service Deployment

VDS offers a wizard-driven deployment process that allows process allows Administrators to drastically streamline the process of provisioning a AVD and/or virtual desktop environment.

Administrators cannot provision deployments to a Legacy environment – only into a Current or Preview environment.
